

Hai ,

I am very happy to inform u all that I have got a job at AppLabs.

My written exam was on 18th & interviews were on 19th.

Here r the details of the exam and interview pattern in AppLabs. I hope it will help U in future.

The written test was easy. 25 mins - 30 Qs (10 Verbal , 10 Quants, 10 Reasoning)

All were very easy (no synonyms, antonyms) only to test our grammar.

Quants had probs on Ages, Proportions, Time & Work, Time & distance, numbers etc.

Reasoning took some time. Qs on relationships, letters etc.

5 rounds of Interviews :

1st : for testing communication skills (General Qs)

2nd: technical Qs (languages used in Projects). Some Qs on project

3rd : technical Qs - by senior employees (tough one) In detail abt the projects. Lot of tough questions.

4th : HR + Some technical Qs (by senior most persons) i.e. top level persons.

He checked all of my certificates for 7 National level project presentations and prizes.

----- If v clear this, then v r selected. -----

5th : HR (just a formality).

Out of 3000 candidates, 200 were called for interview and 60 were the available seats.

So, I am quite lucky to get selected in my first job attempt. Most of the selected persons were experienced.
