

hello every one.....

this is ABHILASH from vnrvjiet hyderabad

Aztecsoft visited our campus on 12th july 2006 and the interview process is as follows.....

There are three rounds

1) APPITUDE TEST which consists of C PROGRAM FOR 17 marks and still 33 questions on reasoning, arithmetic etc rs agarwal is enough for this reasoning and other stuff but the thing is those who have written the program are given the priority

out 350, 100 were screened for group discussion th SECOND round

3) and 39 were selected from gd and finally we had technical and hr interview combinedly and they focussed on basics of c, core java and mainly ur communications skills and the way you approach to a question.....

the c programs which we were asked are

1) string palindrome with out using any inbuilt functions

2) a program like 0

12

234

3456

45678

567890

67890

7890

890

90

0

these are the c programs which we were asked.....

i wish all the best .....

hope this might be helpful to u.....
