

FLEXTRONICS PLACEMENT PAPER

Flextronics - Sample Placement Question Papers

This is the latest paper conducted in PSG.

Regarding Flextronics written test, it comprises of 7 papers with total of 90 questions. There are

- 1) Verbal
- 2) Comprehension
- 3) Aptitude
- 4) Mental ability
- 5) C or C++
- 6) Data Structures
- 7) Letter Writing

In verbal, Questions came from GRE verbal and some basic questions in English.

For Comprehension, some times they may give one passage and they will collect the passage and they will give the questions later. So make note of important things in the passage before.

For Aptitude, go through the Quantitative aptitude by R.S. Agarwal

For C paper, they concentrate more on pointers. So be prepared with that. Better go thru Exploring C book.

For mental ability, the questions may be like $2+3*4/5$, + will be replaced by *, * will be replaced by -, you have to find the answer by replacing that.

In Data Structures, They will give the code, you have to find whether it is preorder traversal or post order traversal, binary tree or binary search tree.

Regarding interview thorough with ur areas of interest, ur project and C.

Be cool and answer.
