

US TECHNOLOGY TEST ON 10th OCTOBER AT BHOPAL

I am selected in the US technology so I want to share my selection procedure I hope it will help you.

round 1: written test:

The test consists of two sections. The section 1 is aptitude i.e. the questions from R.S. Aggarwal but the tough ones in this section some logical reasoning was there too mostly the questions are from train, age, boats, distance, profit and loss. In the second section the verbal section 6 unseen passages were there with lots of questions on antonym, synonym. Some fill in the blanks. In short written was tough so try to attempt the whole paper. No negative marking. Test duration 90 mins.

round 2:GD

It was the elimination round they cleared only 75 students from around 150-175. There were two panels. I was in the second panel and the topic given to me is Fresh engineers are for IT industry there were 10 candidates in a batch from which 4 cleared the GD. Try to be relevant to the topic and don't shout.

The others got the subject such as:

Reservation in private sector.

Black and white

red and blue

Bollywood

round 3: Interview

It was mostly the HR kind of interview with some technical questions may be puzzle. The questions are:

What are my strengths and weaknesses?

How many companies I attended before and why I am not selected?

Some question from internet?

Family background?

Some very simple questions were there but they check our communication skills ok that was the whole procedure

ok all the best...
