

VALUE LABS PLACEMENT PAPER

Value Labs - Sample Placement Question Papers

today it is bad experience to me, this is happen bcoz of lack of knowledge in test pattern , i searched for so many sites , but i didnt find any , even the pattern. soo i want to share my experience and pattern dat i faced today.atleast now the others may get the useful info from this.

Totally 220 mebers attended only 22 selected in written(they attempted 4 th section) out of them 6 got selected .no one really don't know the pattern and the timer action

for me it is online test duration is 30 min and note dat it is 4 sections, u hav to maintain da time carefully(i didnt attempted da 4th section bcz i dont know dat it is there upto last second i tried da rest of sections, the timer shows only the over all time , not the sectional time , soo wen u complete one section fully, then only u will get nxt section questionss)

here is da pattern

1.Verbal(9 questions)

it is very easy one total 9 questions r there , some are spelling corrections , some antonyms and synonyms, easy ones , i didnt rember da questions

2.Aptitude(7 questions)

this is also easy one, i got

- 1.numerical problems,
2. wat is the angle wen the time is quarter past 9,
- 3.one problem like there are hens and cows the legs r double the number of heads then how many hens r there,
- 4.if one number is divided by 10 it gives 9 , if divided by 9 gives 8 as reminder,with 8 gives 7.....and if 2 gives i wat is dat number.
- 5.problem on intrest , like for a given ammount 4500 the rate for some amount is 4 % and for the rest of ammount it is 6 %, even though he is getting the same amount wat is da avg rate
6. one person A sold his flat to B for 10% gain , again b sold his flat for 10%loss, wat is da deal given for A by B
- 7.some thing related to % problem(error)

3.Analytical

this one is very very easy

- 1.if a word RESULT is reprinted as 346751 and CAM E is reprinted as 4651 not the same like this one
2. if word MANAGER represnts as AAEGMNR then wat shoud SANDEEP repretss not the same, like this one
- 3.problem on streams
- 4.and 4 more easy questions easy one , u can mark by seeing them

4 .Basic computers

all easy questions likee

- 1.wat is IP
2. identify the binary number given below
- 3.wat is other name for mother board(system board)
- 4.wat is the first micro processor(8088)

like this easy ones

here only I lost with out attempting the 4th section bcz lack of pattern (i.e .timer shown by computer)

so friendsss beware of this model ,I know this will help u alott, all the best for u all

all the remaining rounds are common i.e gd, tech1, tech+hr all are depending upon ur resume
