

## WEP INDIA TELEPHONIC INTERVIEW 2006

Hi,

I have attended a telephonic interview from Wep India Peripherals. It was pure technical. first they asked me to describe about my current job, current CTC, Expected CTS and whether willing to relocate? like that...after that they asked me whether i am ready for a technical interview now (day before yesterday HR called up me to inform abt the telephonic interview). and they asked me to rate myself from 1-10 for sql server, asp.net and vb6.

here r the questions they asked. just for ur reference

ASP.NETVB6SQL Server 2000

- 1) What are cursors?
- 2) What are triggers?
- 3) How to specify parameters in a stored procedure?
- 4) Marks of the students are stored in a table called marks.

How to find the row containing the second largest mark from the table using sql query?

there might have been more ques from sql server.but this is all i remember

finally they asked me if i am selected how soon i can join with them? and they told if am selected from this round next round will be hands on, for that i have to appear in person...and they told they will inform me soon about next round through mail. it lasted around 45 min. ok Now am waiting for that.
