(Name) ______ COMP

COMPUTER SCIENCE AND

Time : 2½ hours] APPLICATIONS [Maximum Marks : 150

Number of Pages in this Booklet: 16

Instructions for the Candidates

- 1. Write your roll number in the space provided on the top of this page.
- 2. This paper consists of seventy five multiple-choice type of questions.
- 3. At the commencement of examination, the question booklet will be given to you. In the first 5 minutes, you are requested to open the booklet and compulsorily examine it as below:
 - (i) To have access to the Question Booklet, tear off the paper seal on the edge of this cover page. Do not accept a booklet without sticker-seal and do not accept an open booklet.
 - (ii) Tally the number of pages and number of questions in the booklet with the information printed on the cover page. Faulty booklets due to pages/questions missing or duplicate or not in serial order or any other discrepancy should be got replaced immediately by a correct booklet from the invigilator within the period of 5 minutes. Afterwards, neither the Question Booklet will be replaced nor any extra time will be given.
 - (iii) After this verification is over, the Test Booklet Number should be entered on the OMR Sheet and the OMR Sheet Number should be entered on this Test Booklet.
- 4. Each item has four alternative responses marked (1), (2), (3) and (4). You have to darken the circle as indicated below on the correct response against each item.

Example: \bigcirc \bigcirc \bigcirc \bigcirc \bigcirc where \bigcirc is the correct response.

- 5. Your responses to the items are to be indicated in the **OMR Sheet given inside the Booklet only.** If you mark your response at any place other than in the circle in the OMR Sheet, it will not be evaluated.
- 6. Read instructions given inside carefully.
- 7. Rough Work is to be done in the end of this booklet.
- 8. If you write your Name, Roll Number, Phone Number or put any mark on any part of the OMR Sheet, except for the space allotted for the relevant entries, which may disclose your identity, or use abusive language or employ any other unfair means, such as change of response by scratching or using white fluid, you will render yourself liable to disqualification.
- 9. You have to return the original OMR Sheet to the invigilators at the end of the examination compulsorily and must not carry it with you outside the Examination Hall. You are however, allowed to carry original question booklet and duplicate copy of OMR Sheet on conclusion of examination.
- 10. Use only Blue/Black Ball point pen.
- 11. Use of any calculator or log table etc., is prohibited.
- 12. There are no negative marks for incorrect answers.

Number of Questions in this Booklet: 75

(In words)

परीक्षार्थियों के लिए निर्देश

- 1. इस पृष्ठ के ऊपर नियत स्थान पर अपना रोल नम्बर लिखिए।
- 2. इस प्रश्न-पत्र में पचहत्तर बहुविकल्पीय प्रश्न हैं।
- 3. परीक्षा प्रारम्भ होने पर, प्रश्न-पुस्तिका आपको दे दी जायेगी। पहले पाँच मिनट आपको प्रश्न-पुस्तिका खोलने तथा उसकी निम्नलिखित जाँच के लिए दिये जायेंगे, जिसकी जाँच आपको अवश्य करनी है:
 - (i) प्रश्न-पुस्तिका खोलने के लिए पुस्तिका पर लगी कागज की सील को फाड लें। खुली हुई या बिना स्टीकर-सील की पुस्तिका स्वीकार न करें।
 - (ii) कवर पृष्ठ पर छपे निर्देशानुसार प्रश्न-पुस्तिका के पृष्ठ तथा प्रश्नों की संख्या को अच्छी तरह चैक कर लें कि ये पूरे हैं। दोषपूर्ण पुस्तिका जिनमें पृष्ठ/प्रश्न कम हों या दुबारा आ गये हों या सीरियल में न हों अर्थात किसी भी प्रकार की त्रुटिपूर्ण पुस्तिका स्वीकार न करें तथा उसी समय उसे लौटाकर उसके स्थान पर दूसरी सही प्रश्न-पुस्तिका ले लें। इसके लिए आपको पाँच मिनट दिये जायेंगे। उसके बाद न तो आपकी प्रश्न-पुस्तिका वापस ली जायेगी और न ही आपको अतिरिक्त समय दिया जायेगा।
 - (iii) इस जाँच के बाद प्रश्न-पुस्तिका का नंबर OMR पत्रक पर अंकित करें और OMR पत्रक का नंबर इस प्रश्न-पुस्तिका पर अंकित कर दें।
- प्रत्येक प्रश्न के लिए चार उत्तर विकल्प (1), (2), (3) तथा (4) दिये गये हैं।
 आपको सही उत्तर के वृत्त को पेन से भरकर काला करना है जैसा कि नीचे दिखाया गया है।

उदाहरण: (1) (2) ■ (4) जबिक (3) सही उत्तर है।

- 5. प्रश्नों के उत्तर केवल प्रश्न पुस्तिका के अन्दर दिये गये OMR पत्रक पर ही अंकित करने हैं। यदि आप OMR पत्रक पर दिये गये वृत्त के अलावा किसी अन्य स्थान पर उत्तर चिन्हांकित करते हैं, तो उसका मृल्यांकन नहीं होगा।
- 6. अन्दर दिये गये निर्देशों को ध्यानपूर्वक पहें।
- 7. कच्चा काम (Rough Work) इस पुस्तिका के अन्तिम पृष्ठ पर करें।
- 3. यदि आप OMR पत्रक पर नियत स्थान के अलावा अपना नाम, रोल नम्बर, फोन नम्बर या कोई भी ऐसा चिह्न जिससे आपकी पहचान हो सके, अंकित करते हैं अथवा अभद्र भाषा का प्रयोग करते हैं, या कोई अन्य अनुचित साधन का प्रयोग करते हैं, जैसे कि अंकित किये गये उत्तर को मिटाना या सफेद स्याही से बदलना तो परीक्षा के लिये अयोग्य घोषित किये जा सकते हैं।
- 9. आपको परीक्षा समाप्त होने पर मूल OMR पत्रक निरीक्षक महोदय को लौटाना आवश्यक है और परीक्षा समाप्ति के बाद उसे अपने साथ परीक्षा भवन से बाहर न लेकर जायें। हालांकि आप परीक्षा समाप्ति पर मूल प्रश्न-पुस्तिका तथा OMR पत्रक की डुप्लीकेट प्रति अपने साथ ले जा सकते हैं।
- 10. केवल नीले/काले बाल प्वाईंट पेन का ही इस्तेमाल करें।
- 11. किसी भी प्रकार का संगणक (कैलकुलेटर) या लाग टेबल आदि का प्रयोग वर्जित है।
- 12. गलत उत्तरों के लिए कोई नकारात्मक अंक नहीं हैं।

21. Let n = 4 and $(a_1, a_2, a_3, a_4) = (do, if, int, while)$. Let $p(1:4) = \left(\frac{3}{8}, \frac{3}{8}, \frac{1}{8}, \frac{1}{8}\right)$ and

 $q(1:4) = \left(\frac{2}{8}, \frac{3}{8}, \frac{1}{8}, \frac{1}{8}, \frac{1}{8}\right) \text{ where p(i) and q(i) denotes the probability with which we search } a_i$ and the identifier x being searched satisfy $a_i < x < a_{i+1}$ respectively. The optimal search tree is given by :

22. The family of context sensitive languages is _____ under union and _____ under reversal.

- (1) closed, not closed
- (2) not closed, not closed

(3) closed, closed

(4) not closed, closed

23. Match the following:

List - I

- (a) $\{a^n b^n | n > 0\}$ is a deterministic context free language
- List II

 (i) but not recursive language
- (b) The complement of $\{a^n b^n a^n | n > 0\}$ is a context free language
- (ii) but not context free language
- (c) {aⁿ bⁿ aⁿ} is context sensitive language (iii)
 - iii) but can not be accepted by a deterministic pushdown automation
- (d) L is a recursive language
- (iv) but not regular

Codes:

- (a) (b) (c) (d)
- (1) (i) (ii) (iii) (iv)
- (2) (i) (ii) (iv) (iii)
- (3) (iv) (iii) (ii) (i)
- (4) (iv) (iii) (i) (ii)

24. The language of all non-null strings of a's can be defined by a context free grammar as follow:

$$S \rightarrow a S |S a| a$$

The word a³ can be generated by _____ different trees.

- (1) Two
- (2) Three
- (3) Four
- (4) Five

(4)

All of the above

57. What will be the output of the following Unix command?

 $\rm poly 1 - 3$

- Remove file chap0[1 3] (1)
- Remove file chap01, chap02, chap03 (2)
- Remove file chap\ $[1 3\]$ (3)
- None of the above (4)
- Which of the following statements regarding the features of the object-oriented approach to 58. databases are true?
 - (a) The ability to develop more realistic models of the real world.
 - The ability to represent the world in a non-geometric way. (b)
 - The ability to develop databases using natural language approaches. (c)
 - The need to split objects into their component parts. (d)
 - The ability to develop database models based on location rather than state and behaviour. (e)

Codes:

- (1) (a), (b) and (c) (2)
- (b), (c) and (d) (3) (a), (d) and (e) (4) (c), (d) and (e)

59. Consider the following database table:

Create table test(

```
one integer,
two integer,
primary key(one),
unique(two),
check(one \ge 1 \text{ and } \le 10),
check(two > = 1 \text{ and } < = 5)
```

How many data records/tuples atmost can this table contain?

- (1)5
- (2) 10
- (3) 15
- (4) 50
- Suppose ORACLE relation R(A, B) currently has tuples {(1, 2), (1, 3), (3, 4)} and relation S(B, C) currently has {(2, 5), (4, 6), (7, 8)}. Consider the following two SQL queries SQ1 and SQ2:

SQ1: Select *

From R Full Join S

On R.B = S.B;

SQ2: Select *

From R Inner Join S

On R.B = S.B;

The numbers of tuples in the result of the SQL query SQ1 and the SQL query SQ2 are given by:

- (1)2 and 6 respectively
- (2) 6 and 2 respectively
- 2 and 4 respectively
- (4)4 and 2 respectively

- **61.** Consider the following three SQL queries (Assume the data in the people table):
 - (a) Select Name from people where Age>21;
 - (b) Select Name from people where Height>180;
 - (c) Select Name from people where (Age>21) or (Height>180);

If the SQL queries (a) and (b) above, return 10 rows and 7 rows in the result set respectively, then what is one possible number of rows returned by the SQL query (c)?

- (1) 3
- (2) 7
- (3) 10
- (4) 21
- **62.** The distributed system is a collection of <u>(P)</u> and communication is achieved in distributed system by <u>(Q)</u>, where (P) and (Q) are :
 - (1) Loosely coupled hardware on tightly coupled software and disk sharing, respectively.
 - (2) Tightly coupled hardware on loosely coupled software and shared memory, respectively.
 - (3) Tightly coupled software on loosely coupled hardware and message passing, respectively.
 - (4) Loosely coupled software on tightly coupled hardware and file sharing, respectively.
- **63.** Consider the following three tables R, S and T. In this question, all the join operations are natural joins (\bowtie). (π) is the projection operation of a relation :

	R		S		T
A	В	В	С	A	С
1	2	6	2	7	1
3	2	2	4	1	2
5	6	8	1	9	3
7	8	8	3	5	4
9	8	2	5	3	5

Possible answer tables for this question are also given as below:

A	В	С									
1	2	4									
1	2	5									
3	2	4									
3	2	5	A	В	C	A	В	С			
5	6	2	1	2	2	1	6	2			
7	8	1	3	2	5	3	2	5	A	В	С
7	8	3	5	6	4	5	2	4	3	2	5
9	8	1	7	8	1	7	8	1	7	8	1
9	8	3	9	8	3	9	8	3	9	8	3
	(a)	•		(b)			(c)			(d)	

What is the resulting table of $\pi_{A,B}(R \bowtie T) \bowtie \pi_{B,C}(S \bowtie T)$?

- (1) (a)
- (2) (b)
- (

(4) (d)

64. Consider the two class classification task that consists of the following points:

Class $C_1 : [-1, -1], [-1, 1], [1, -1]$

Class C_2 : [1, 1]

The decision boundary between the two classes C_1 and C_2 using single perceptron is given by:

 $x_1 - x_2 - 0.5 = 0$ (1)

- (3) $0.5(x_1 + x_2) 1.5 = 0$
- Consider a standard additive model consisting of rules of the form of 65.

If x is A_i AND y is B_i THEN z is C_i .

Given crisp inputs $x = x_0$, $y = y_0$, the output of the model is :

- $z = \sum_{i} \mu_{A_i}(x_0) \mu_{B_i}(y_0) \mu_{C_i}(z)$ (1)
- (2) $z = \sum_{i} \mu_{A_i}(x_0) \mu_{B_i}(y_0)$
- (3) $z = \operatorname{centroid}\left(\sum_{i} \mu_{A_{i}}(x_{0}) \mu_{B_{i}}(y_{0}) \mu_{C_{i}}(z)\right)$
- (4) $z = \operatorname{centroid}\left(\sum_{i} \mu_{A_{i}}(x_{0}) \mu_{B_{i}}(y_{0})\right)$
- A bell-shaped membership function is specified by three parameters (a, b, c) as follows: 66.

(1)
$$\frac{1}{1 + \left(\frac{x-c}{a}\right)^b}$$
 (2) $\frac{1}{1 + \left(\frac{x-c}{a}\right)^{2b}}$ (3) $1 + \left(\frac{x-c}{a}\right)^b$ (4) $1 - \left(\frac{x-c}{a}\right)^{2b}$

- Which of the following is/are the principle components of a memory-tube display? 67.
 - Flooding gun

- (b) Collector
- (c) Phosphorus grains
- (d) Ground

Codes:

- (1)(a) and (b)
- (2) (c) only
- (3)(d) only
- (4)All the above
- 68. Which of the following steps is/are not required for analog to digital conversion?
 - Sensing
- (b) Conversion
- Amplification (c)

- (d) Conditioning
- (e) Quantization
- Codes:
- (1)(a) and (b)

(2) (c) and (d)

(a), (b) and (e)

(4)None of the above 69. Which raster locations would be chosen by Bresenham's algorithm when scan converting a line from (1, 1) to (8, 5)?

(3)

(1)	x	y
	1	1
	2	2
	3	3
	4	3
	2 3 4 5 6 7	2 3 3 4 4 5 6
	6	4
	7	5
	8	6

\boldsymbol{x}	y
1	1
2	2
3	2
4	3
5	4
6	5
7	6
8	7

x	y
1	1
2 3	2
3	2 2 3
4	3
5	3
6	4
7	4
8	5

(4)	х	y
	1	1
	2	2
	3	2
	4	3
	3 4 5 6 7	2 2 3 5 4 5 5
	6	4
	7	5
	8	5

70. Consider a unit square centred at origin. The coordinates of the square are translated by a factor $\left(\frac{1}{2}, 1\right)$ and rotated by an angle of 90°. What shall be the coordinates of the new square?

(1)
$$\left(\frac{-1}{2}, 0\right), \left(\frac{-1}{2}, 1\right), \left(\frac{-3}{2}, 1\right), \left(\frac{-3}{2}, 0\right)$$

(2)
$$\left(\frac{-1}{2}, 0\right), \left(\frac{1}{2}, 1\right), \left(\frac{3}{2}, 1\right), \left(\frac{3}{2}, 0\right)$$

(3)
$$\left(\frac{-1}{2}, 0\right), \left(\frac{1}{2}, 0\right), \left(\frac{-3}{2}, 1\right), \left(\frac{-3}{2}, 0\right)$$

(4)
$$\left(\frac{-1}{2}, 0\right), \left(\frac{1}{2}, 1\right), \left(\frac{-3}{2}, 1\right), \left(\frac{-3}{2}, 0\right)$$

71. Which of the following is/are the components of a CRT?

- (a) Electron Gun
- Control Electrode (b)
- (c) Focusing Electrode
- Phosphor Coated Screen (d)

Codes:

(1)(a) and (d)

- (a), (b) and (d)
- (a), (b), (c) and (d)
- (4) (a), (c) and (d)

- **72.** Which one of the following statements is **incorrect**?
 - (1) Pareto analysis is a statistical method used for analyzing causes, and is one of the primary tools for quality management.
 - (2) Reliability of a software specifies the probability of failure-free operation of that software for a given time duration.
 - (3) The reliability of a system can also be specified as the Mean Time To Failure (MTTF).
 - (4) In white-box testing, the test cases are decided from the specifications or the requirements.
- 73. Consider a language A defined over the alphabet $\Sigma = \{0, 1\}$ as $A = \{0^{\lfloor n/2 \rfloor} 1^n : n > = 0\}$.

The expression $\lfloor n/2 \rfloor$ means the floor of n/2, or what you get by rounding n/2 down to the nearest integer.

Which of the following is **not** an example of a string in A?

- (1) 011
- (2) 0111
- (3) 0011
- (4) 001111
- **74.** Which one of the following statements, related to the requirements phase in Software Engineering, is **incorrect**?
 - (1) "Requirement validation" is one of the activities in the requirements phase.
 - (2) "Prototyping" is one of the methods for requirement analysis.
 - (3) "Modelling-oriented approach" is one of the methods for specifying the functional specifications.
 - (4) "Function points" is one of the most commonly used size metric for requirements.
- 75. ______tag is an extension to HTML that can enclose any number of Javascript statements.
 - (1) <SCRIPT>
- (2) <BODY>
- (3) <HEAD>
- (4) <TITLE>
